CAPG Moves to New Offices

Los Angeles, CA, March 8, 2004 . . . The California Association of Physician Groups (CAPG) has recently moved its offices to 915 Wilshire Blvd., Suite 1620, Los Angeles. The move was necessary to accommodate the additional space needed for the increasing services and growing membership of the association.

CAPG is the largest association of physician groups in California. It is made up of 135 of state's leading medical groups and IPAs that employ or contract with approximately 38,000 doctors. These doctors provide health care services to approximately 11.5 million Californians, which translates to over 50-percent of the state's healthcare being delivered by physicians who are contracted with CAPG members. CAPG members are committed to the delivery of coordinated, accountable and clinically integrated healthcare services.
