**CAPG Launches Website**

Los Angeles, CA, July 26, 2004 . . . The California Association of Physician Groups (CAPG) has recently launched a new website that features comprehensive information on the leader of California's organized delivery system. The site, designed by Vision Internet, provides specific information to CAPG members, as well as offers visitors the latest news on the state's legislative activities, advances in technology and the status of programs in development to support organized medicine in California.

"We've been working hard on this site to ensure it will have the technical ease as well as timely content that is relevant to medical providers as well as other healthcare professionals," said Donald Crane, president and CEO of CAPG. "As the largest association of physician groups in California, we feel it's our role to provide members of the California healthcare industry with the most up-to-date information concerning organized care."

CAPG is comprised of 143 of the state's leading medical groups and IPAs that employ or contract with doctors who provide health care services to approximately 13 million Californians, which translates to over 50-percent of the state's healthcare services. CAPG members are committed to the delivery of coordinated, accountable and clinically integrated healthcare services. The CAPG website address is [www.capg.org](http://www.capg.org).
