

# RISK EVOLUTION TASK FORCE

AMERICA'S  
PHYSICIAN  
GROUPS

[America's Physician Groups](#) (APG) is pleased to announce the **Risk Evolution Task Force**, a learning collaborative dedicated to accelerating the value movement and developing the next iteration of Advanced Alternative Payment Models (Advanced APMs). APG and Task Force members are committed to the proliferation of accountable care that better utilizes resources through the delivery of high-quality, coordinated healthcare services to patients and communities.

The Risk Evolution Task Force offers physician groups engaged in two-sided risk models an opportunity to improve their performance in their current programs and influence the development of new models, including Direct Contracting. The Task Force will focus on the dual purpose of both supporting our members and improving current risk based models and helping develop and prepare APG members for new models to come.

Led by Co-Chairs and APG Members Niyum Gandhi ([Mount Sinai](#)) and Melanie Matthews ([Physicians of Southwest Washington](#)), the Risk Evolution Task Force will also rely on Aneesh Chopra, MPP – President of [CareJourney](#), former U.S. Chief Technology Officer, who will assist members with data analytics and care transition planning.

[Valinda Rutledge](#), APG's Senior Vice President of Federal Affairs, will lead the advocacy portion of the Task Force and coordinate outreach.

For more information on APG's Risk Evolution Task Force including how to join, please contact [Valinda Rutledge](#) (202-770-1869).
